## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1.     The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2.     Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the recitation "…invalidation unit comprises a function to interrupt the invalidation of said preceding image data stored in said image data storage unit so as to invalidate said preceding image data with said new image data being input to said device." This limitation is vague and indefinite. Proper correction is requested.

Regarding claim 2, the recitation "…when there is input of a new image data through said image data input unit after said image data invalidation unit **has completed the invalidation** of a **preceding image** data stored in said image data storage unit, said image data invalidation unit comprises a function to **invalidate said preceding image data** (invalidation was already completed, see the second line related to claim 2) with a new image data being input to said device. Proper correction is requested. Similar issues in other claims, if existing, need to be corrected.
